SUMMARY

Productivity, Consistency, and Creativity

I'm Yosef, a **Full Stack Developer** experienced with **React, NodeJS, MongoDB, AWS, and Docker**. With proven background building an AI-based recipe creation platform that helps to create personalized culinary experiences. Ready for my next challenge in a company that is looking for a committed developer that delivers robust, maintainable, and scalable solutions.

EXPERIENCE

2024 - Present: Full Stack Developer, CulinaryGPT

I Designed and implemented a scalable full-stack system using **React, Node.js, and MongoDB** to deliver seamless recipe generation and storage. Integrated **real-time APIs** for recipe and image creation, optimizing **backend** performance with **Server-Sent Events (SSE)** to reduce wait times. I deployed the app on **AWS EC2** for high availability and scalability, containerized the system with **Docker** to streamline deployments, and ensured modular **architecture** & top security standards.

- Reduced total recipe generation in more **than 60%** by parallelizing **API calls**.
- Support more than **1 million** recipes creations, making sure scalability and availability.

2023 - 2024: Front-end Developer, MessageSpace

I was responsible for developing a fast, scalable, and user-friendly interface using **React**, designing an appealing **UX/UI** and implementing strict authentication using **JWT**. I integrated with Python Backend services, worked with **3rd party API** such as WhatsApp, and collaborated with a diverse team of product, developers and designers.

- Developed strong teamwork skills through effective collaboration in a fast-paced environment.
- Aligned on sprint goals for delivery in an Agile environment.

PROJECTS:

2023: Full Stack Developer, CodeExplainer

I developed CodeExplainer to simplify Github code using an AI based engine. I built the entire front end from scratch using **React, Typescript, and Tailwind CSS**, created an Intuitive **UI** and utilized **React Query** for data fetching and state management. I developed the backend infrastructure using **NodeJS**, integrated with **MongoDB** to maintain the platform information and worked with 3rd party restful APIs.

- Delivered a system that empowers student developers to understand and learn code with ease.
- Increased scalability with easy-to-use **system-design** and **UI** components.

EDUCATION

2022 - 2023: Full Stack Developer, INT Collage

During this course, I gained experience through projects that bridged the theoretical and practical gaps. I specialized in Frontend Development using **HTML, CSS, JavaScript, Typescript, React & Redux** as well as Backend development with **NodeJS, ExpressJS, Redis & MongoDB**.
